

# 201918010403-Kaylin-semester2-week8

Chengdu University of Technology Oxford Brookes College

Project Module (CHC 6096)

Weekly Report Sheet

STUDENT NAME:	Kaylin (Zhang Ningyue)
STUDENT NUMBER:	201918010403
SUPERVISOR NAME:	Gore Jiang
DATE:	2023/4/21 (week 8)

Briefly list all the main tasks you accomplished in the week.

1. Set navigation bar permissions. Ensure that only teachers and administrators can add, delete and modify course information. Consider applying JSP judgment statements to solve this problem.
2. Test the password change function. Ensure that different types of users can successfully change their passwords after login.
3. Test the course list. The jsp page should load successfully and JSON should get the list of courses accurately.
4. Check the course related tables in the database. Update the query list and improve the fuzzy search of course information.

Briefly state all the challenges you encountered in the week.

1. When testing the course selection function, it was found that when a student selected a course, the total number of students enrolled in the course did not increase correspondingly.

Briefly Plan out the agenda for next week.

1. Solve the problem that students have chosen courses but the number of students has not increased. Check whether the course selection record is inserted into the database.
2. Improve the course interface to show users the maximum number and the current number of students.
3. Check permissions of the course selection function. If a user logs in as a student, he can only view information about courses of his choice. If the user logs in as a teacher or administrator, the course selection information of all students can be viewed.
4. Conduct functional tests to ensure that teachers and administrators can delete course information in batches.
